

WHO IS ETOLLWARE?

Ram Info LLC, with more than a decade of dedicated tolling experience, is an expert in providing state-of-the-art back office solutions to the Electronic Toll Collection (ETC) industry. With a proven track record in software development, maintenance and upgrades that help tolling agencies move quickly into all electronic tolling.

We architect each of our solutions to meet the specific requirements of our client tolling authorities, with a focus on modularized, easily customized, user-friendly systems. Our customers also value our emphasis on maximizing prior infrastructural investments while minimizing future operational costs.
